## Official Paper of Cochise Co.

STURDAY, JANUARY, 27.

It is estimated that over \$50,000,000 of American capital has been invested in Mexico in mining operations during the past year.

The war in South Africa is fast and furious this week, and the plucky Boers appear to be holding their own against fearful odds.

The story of the famine in India sickens the heart and staggers the understanding. Although the government of India is feeding about three millions two hundred and fifty thousand persons, something like forty-nine millions of other persons are affected. The viceroy has said that the famine area has expanded and that India is now facing a cattle, water and food scarcity of a most terrible character.

It will be four years next summer since the discovery of gold in the Klondike country excited the whole country, and just to show what the enterprising pioneers have accomplished in this brief space of time it is announced that the White Pass & Yukon railway will probably be opened next June, in which case it will be possible to make the whole trip from Taiya to Dawson by rail and boat. There certainly has been some tall bustling done.

The ordinance bureau of the navy has begun the investigation of a new explosive known as "Mareite." It is supposed to be a nitrate compound. It has been demonstrated that it is impossible to produce an explosion with it by hard blows, nor will it explode when lighted. To explode it, it is necessary to use simultaneously the combined forces of percussion and concussion. These forces were secured by the use of electricity. Further experiments are being conducted and great success is expected.

The director of the census suggests and requests that the agriculturists of this country use some of their spare time between now and June next in thoroughly preparing themselves to answer promptly and accurately the questions relative to the acreage, quantity and value of crops; the quantity and value of all farm products and vegetables; the cost of fertilizers and farm labor, and, in fact, all the items of farm operations for the calendar year 1899, which the census enumerator is by law compelled to ascertain. This, he says, will result in a full and accurate census, which is what everybody desires.

AMERICAN veterans of the war of the rebellion are reading with amazement accounts of the treatment that is given British prisoners by the Boers. A letter said to have been written by an English officer, a prisoner of war in Pretoria, to a member of his family, reveals some very agreeable pictures. After telling that he and his companions are prisoners of war and in a "pitiful condition," the correspondent goes on to show how truly pitiful this condition is. He admits that as far as health goes they are all very well treated; that they "receive visits from the leading officials, who are very polite; that the government gives them canned beef, lime juice, potatoes, an iron bedstead with mattress, a pillow, a pajama suit, slippers, flannel shirt, pocket handkerchief, towels, socks, etc. By organizing a mess they are able to add to their menu preserved vegetables, potted meats, pickles, tobacco and a few other delicacies. They are allowed ten privates from their regiment to act as servants. A bathroom is also provided." The cruelties of the Boers appear to have been somewhat overdrawn.

## COPPER IS THE METAL.

The Cochise Copper Mining Company, Bisbee, Arizona.

This company owns a very valuable group of mines situated in Warren mining district, county of Cochise, Arizona, lying immediately east of and adjoining the town of Bisbee, and adjoining the property of the Copper Queen Consolidated Mining Company on the north. The latter company has been in operation for about twenty years, and employs about 1,500 men daily in the operation of its mammoth mine and smelters, and as a result has produced copper to over 34,000,000 pounds during the year 1898, and the net proceeds of such production are reported to have been over \$2,000,000, and it has been said by experienced miners who have been under its employment for years, that the Queen mine now has sufficient ore in sight to keep it in constant operation for the next twenty years without further development.

Is it not reasonable to believe that the property of the Cochise company is fully as valuable, when it is within such close proximity to such a wonderful mine?

The blasts set off in the underground workings of the Queen property can easily be felt and heard at the shaft of our mine, and oftentimes the concussion has attracted marked attention.

The original owners of these valuable mines are local business men, well and favorably known in Bisbee, and surrounding vicinity, who are doing their utmost to make this enterprise a success in every respect. The board of directors are original owners, and are donating their services to the company until such time as the mine will pay dividends. They own the controlling interest in this property, and as a protection to stockholders have placed their entire interest in escrow for a term of one year.

The stock books of our company are now open for subscriptions, and a limited number of shares are offered at twenty-five cents per share. No application for less than 100 shares will be accepted.

The company reserve the right at any time to advance the price of shares without further notice, or to reject any application for stock at their discretion.

Every cent received from the sale of stock will be expended toward the development of our property and the erection of hoisting works, and all other necessary improvements, and to make our enterprise a success in every particular.

We invite investigators and their experts or their engineers to closely scrutinize our property.

Applications for shares may be made to any of the directors of the company, or to any of our legally authorized representatives.

J. MUHEIM, Supt. & Treas.
